

Name _____

Date _____

Imagine that one of your classmates missed the lesson on the **Empirical Rule** and has asked you for help to catch up. Please assist your classmate by responding to the prompt below. Please write in complete sentences and include diagrams (pictures), charts, examples, notation (σ , μ , etc...) or calculations as needed.

Note: If you actually did miss the lesson, please connect with a friend to get a copy of the notes or make sure that you have read this section in our text so that you can complete this assignment appropriately. 😊

Prompt:

Help your classmate by outlining **three of the most important ideas** from our lesson on the **Empirical Rule**.

- Be sure to include information for your classmate on how **z-scores** are involved in using the Empirical Rule in at least one of your important ideas.

Important Idea # 1:

Important Idea # 2:

Important Idea # 3:
